SANKOFA CLUB

Community Outreach Initiative & International Presentation

Echipparra Tribal School, Kerala

Presented at the Sankofa International Forum, in association with IEEE Smart Village

Prepared For	College Administration / Sankofa Club Records
Organizing Body	Sankofa Club, under IEEE Smart Village, Christ College of Engineering (Autonomous), Kerala
Activity Type	Tribal Community Outreach & Educational Support

1. Introduction

This report presents an account of the community outreach initiative undertaken by the Sankofa Club of the college, functioning under the umbrella of IEEE Smart Village. It documents the outreach activity conducted at the Echipparra Tribal School in Kerala, as well as the subsequent presentation of the initiative's outcomes at an international forum.

2. About the Sankofa Club

The Sankofa Club operates under the aegis of IEEE Smart Village, an initiative dedicated to sustainable community development and education, with a particular focus on empowering underserved and marginalized populations. The club channels student energy and skill into meaningful, ground-level social impact projects.

3. Outreach Activity

Overview

- Location: Echipparra Tribal School, Kerala
- Participants: 29 Btech Student volunteers of the Sankofa Club, CCE, 2 faculties from CCE
- Objective: To educate and support students from a backward tribal community
- Nature of Activity: Direct educational engagement and mentoring sessions

As part of this initiative, student volunteers from the Sankofa Club visited the Echipparra Tribal School and conducted educational sessions aimed at improving learning outcomes among the tribal community's children. The activity reflected the club's broader mission of extending quality education to communities with limited access to structured learning resources.

4. International Presentation

Following the successful completion of the outreach activity, the participating students were invited to present their experience and outcomes at an international forum jointly convened by the Sankofa International Forum and IEEE Smart Village.

Panel of Attendees

Name	Affiliation
Prof. Toby C.	IEEE Smart Village / Sankofa International Forum
Ms. Indira	IEEE Smart Village / Sankofa International Forum
Ms. Patience	IEEE Smart Village / Sankofa International Forum
Mr. Fidelis	IEEE Smart Village / Sankofa International Forum
Fr. John Palliakara	Executive Director, CCE
Fr. Milner Paul	Joint Director, CCE
Dr. Sijo M T	Principal, CCE
Dr. Sudha Balagopalan	Sankofa Club Charge
Ms. Anitta Antony	Sankofa Club Co-ordinator
Ms. Anitta Antony	Sankofa Club Co-ordinator
Ms. Anjana S	Sankofa Club Co-ordinator

Outcome

The students delivered a comprehensive presentation detailing their engagement with the tribal community at Echipparra, covering their approach, challenges encountered, and the impact of their work. The presentation was well received by the panel, and the students were commended for their initiative, dedication, and the meaningful social impact of their efforts.

5. Summary of Key Details

Item	Detail
Organizing Club	Sankofa Club (under IEEE Smart Village)
Outreach Location	Echipparra Tribal School, Kerala
Beneficiary Community	106 Students from Class 1 to 4 from underserved tribal community
Presentation Forum	Sankofa International Forum, in association with IEEE Smart Village
Panel Members	Prof. Toby C., Ms. Indira, Ms. Patience, Mr. Fidelis
Outcome	Presentation appreciated by the international panel

6. Conclusion

This initiative exemplifies the Sankofa Club's ongoing commitment to community-driven education and social responsibility. The successful outreach at the Echipparra Tribal School, followed by a well-received presentation at an international forum, underscores both the dedication of the participating students and the effectiveness of the program in bridging educational gaps for underserved communities. This achievement further strengthens the college's partnership with IEEE Smart Village and its broader global mission.

End of Report

- ***Project title and location:***

Sankofa Club at Christ College of Engineering, Thrissur, Kerala, India

- ***Objectives of the pilot***

1. Get near peer students to write and refine a curriculum based on ‘what is at hand only’ for STREAM education in remote non-accessible areas (of India and Africa)
2. Deliver the content to children from Tribal schools (where students come from underserved and distressed communities. Get feedback from the children, their parents and teachers on curriculum, implementation plans and extension
3. Reporting to Sankofa with pictures, videos and feedback for a 2 way communication for better practices and effectiveness.

4. Diverge to other similar schools and to more experiential learning in this 2 way education

- ***Activities carried out***

1. Inaugurated the Sankofa club in the campus.
2. Students made around 50 course plans and refined them with inputs from faculty members.
3. 29 students and 2 teachers proceeded to a tribal school and held a 3 hour session as per objectives 2 and 3.
4. The students presented their experience in a zoom meeting with several valued members from Sankofa and from our institution attended and acknowledged and appreciated the student work.

- ***Number and profile of beneficiaries:***

106 children from the Echippara Tribal School, class 1-4 attended with 3-4 teachers of these children watching from the sidelines.

The beneficiaries also included the attendees of the Zoom meeting, since the students from the Sankofa club shared valued lessons via their observations and experiences.

- ***Key achievements and outcomes:***

1. ***Key Achievements:***

A. The interactions were so effective that the children insisted on more such sessions.

B. The Sankofa club members (our students) learned that education is always a 2 way journey which equipped them for life with purpose and empathy.

C. Plans are in place for prolonged engagement and more such schools to be taken under the wing.

2. ***Key Outcomes:***

A. Sankofa club members completed a very special internship which they will add to their CV which will enhance their job opportunities as good communicators.

B. Plans have been formulated for extending the programme to 37 experiment based curriculum, which is designed to give awareness to underserved schools and tribal schools on different types of vocations and career paths to be taken.

- ***Challenges encountered***

1. School timings with a year long academic calendar clash with engineering college timings with semester based calendars. In addition to university exams we have 3 continuous evaluation tests and a series assignments which makes it difficult for us to arrange more interactions with school children with a different type and season of Exams.
2. The change of guards in schools, tribal development corporations and local self governments affect the general scheme of things. Many delays, change of attitude, bureaucratic difficulties are playing out until stability emerges.

- ***Lessons learned***

Many valuable lessons were learnt

A. School children learnt about education interests, values, attitudes and responses of school children to modes of content delivery.
B. Sankofa club members as facilitators learnt about themselves and the joy of giving and about the motivational energy when young lives respond trustingly to them.
C. The confidence participants develop when interactions are mutually acknowledged and appreciated.
D. That the idea of Sankofa is a well accepted concept.

- ***Impact on the local community, particularly on children's learning and development***

Impact assessment will take time but the short duration impact is mostly trust building. And through the young children the cooperation and confidence of the parents of these children on the intentions of our institution is crucial for bringing in any further development activities.

- ***High-quality photographs (where available)***

- ***Recommendations and future plans***
