SANKOFA MASTER PLAN 2026 & BEYOND

A volunteer-centred roadmap for practical, community-led STREAM education in underserved contexts

Sankofa volunteers lead busy lives, most with full-time jobs, families, travelling, and challenges with network connectivity and reliable electricity.

Spare time is precious and needs to be enjoyed and used productively. This Master Plan, containing both the longer-term vision and the short-term (90-day) goals, will help the core groups focus on their priorities, and know who is doing what, and when.

While this document is open to input, updates will follow agreed review cycles to maintain clarity, accountability, and momentum.

KEY DOCUMENTS

- Meeting & Communication Rhythm - outlines the frequency of meetings and suggested agendas to ensure we're using time efficiently
- Roles and Responsibilities - outlines the core group roles and responsibilities
- Metrics chart - assist groups and individuals in measuring success and building their sense of accountability (in development—SC)

VISION (draft)

Every child, regardless of circumstance, has access to learning STREAM fundamentals through education rooted in their daily life, culture, and community.

MISSION STATEMENT (draft)

Sankofa acts as a catalyst in promoting community-based STREAM education by empowering local mentors to teach using available resources, enabling quality learning in under-resourced urban and rural communities.

VALUES

These encapsulate the spirit of Sankofa and define our culture and personality. If Sankofa were a person, what would they stand for, be passionate about, and believe in? What values do we want our volunteers to have? These values guide our decisions, not just our behaviour.

1) Courage - We try new things, experiment, and are unafraid to challenge
2) Curiosity - We better understand the broader mission and expand our learning
3) Creativity - We find innovative solutions and value new ideas

4) Impact - We prioritise actions that lead to measurable learning outcomes
5) Good judgement - We act transparently, inclusively, and take responsibility for outcomes
6) Courage - We try new things, experiment, and are unafraid to challenge
7) Curiosity - We better understand the broader mission and expand our learning
8) Creativity - We find innovative solutions and value new ideas

---

OUTCOMES

What do we look for as an outcome of Sankofa teaching? The children will be able to demonstrate:

1. Self-confidence in skill acquisition
2. Self-reliance in designing, planning and conducting activities
3. Aspiration for higher education
4. Any special talent and desire to hone it

GOALS

LONG-TERM (3-5 YEARS)

What's the big dream for Sankofa with unlimited resources?

1) Operating through partnerships, presence or influence, catalyse a global, networked, self-sustaining organisation that functions worldwide
2) Establish a shared online resource for teaching materials using what's at hand, open to contributions and accessible to all
3) Reach over 1 million children per year through these connections, materials and learning ethos

1 YEAR

Measurable goals that we understand and what success looks like at year's end:

1) Secure at least one multi-month funding commitment to support core operations and pilots
2) Implement 5+ pilots in 5 different countries
3) Develop a framework for initiating Sankofa programs in impoverished communities

---

90 DAY PRIORITIES | JAN - MAR 2026 (REVIEWED EVERY 3 MONTHS)

This list outlines suggestions for immediate activities arising from work done already. It is by no means final. We seek to provide a wide scope of tasks so everyone can have a job and contribute directly to the success of Sankofa.

These goals will be discussed and updated by group leaders every 90 days, with every priority listed contributing directly towards the 1-year goals.

CURRICULA

1) In all curricula, it is imperative to keep the implementation in sight
2) Presentation of Sudha's students' lesson plans, mode of implementation tried, and feedback received
3) Each curriculum volunteer reviews at least two lesson plans and provides feedback.
4) Each curriculum volunteer shares two or more lesson plans with someone they know who can provide honest feedback
5) Make lesson plans available through the website with access control.
6) Share plans with Elika - how good is the translation into Swahili?
7) Work with the Aashraa Foundation and RDO to investigate the usefulness of plans

https://bit.ly/3LN7Gqb

DOCUMENTATION AND COMMUNICATION

Phase 1:

A: Organise G-Drive in accordance with the 3 groups

B: Update website to incorporate

a) Stories of pilots - Honda and Sadangi
b) Page to access lesson plans with access control
c) Online translation?
d) Values & Mission statement added (once ready)

Phase 2:

A: Reporting system for feedback and a log of activities

a) Feedback on lesson plans (G-form)
b) Activity log for existing pilots
c) Activity log for community surveys/conversations etc.

IMPLEMENTATION

1) Urgent: Carry out as many community surveys as possible—essential information for fundraising (Community identity will be hidden-identify by general geographic area)
2) Review guidelines for community engagement and costing for Sankofa pilots
3) Work with D & C to write stories of Honda and Sadangi
4) Target: At least one Sankofa-led pilot in each volunteer country by the end of 2026.

OTHER (TOBY & SALAMATU TO LEAD)

1) Working with Ray, create a fundraising strategy, require community surveys/more feedback on lesson plans/more detailed story of Honda
2) Support Implementation on 'finding new pilots'
3) Success metrics covering reach, engagement, lesson effectiveness, and pilot sustainability.
